PART 01

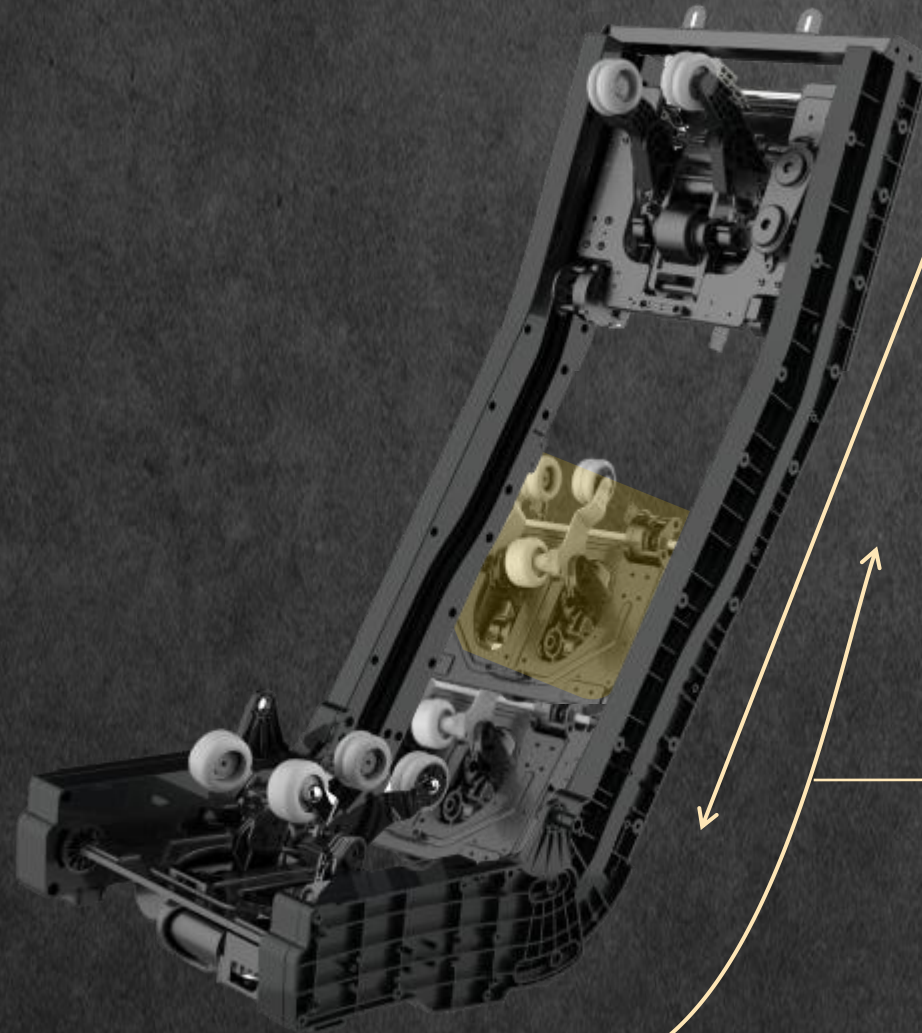

3 Core Technologies

Dual Mechanism (*4D deep fascia massage mechanism + Specialized waist&buttock massage mechanism*)

Flexible track (*Patent technology, truly realizes the Thai-style bridge posture stretching massage*)

2 Way traction auto legrest (*Patent technology, creating upscale leg massage experience*)

3 Core Technologies - Dual Mechanism

Upper: **4D deep tissue** massage mechanism
Covers 784mm from neck to waist

Lower: **Specialized waist&buttock** massage mechanism
Covers 861mm from back to thighs

3 Core Technologies - Dual Mechanism

Upper:

4D deep tissue massage mechanism

New GEN-4 massage mechanism

Muscle pain occurs mostly in fascia. Only deep massage can help relieve the soreness. Rongtai Health has developed a 4D deep fascia massage mechanism that can penetrate into the deep fascia of muscles. With new curved arms and bipolar Hall technology, it can perfectly fit the body curves and perform better kneading, shiatsu and tapping massage techniques for a fast, multi-dimensional, deep and accurate massage experience.

3 Core Technologies - Dual Mechanism

Lower: **Specialized waist&buttock** massage mechanism
(coupled with) Intelligent robot hand

This ergonomic mechanism fits to the curves of back, waist and buttocks snugly. The 103° wide-angled high bionic robot hands switch smoothly between horizontal and vertical and performs shiatsu, tapping, knocking, kneading and sync massage techniques covering the entire back to ease stiffness.

3 Core Technologies - Dual Mechanism

Features of Dual Mechanism:

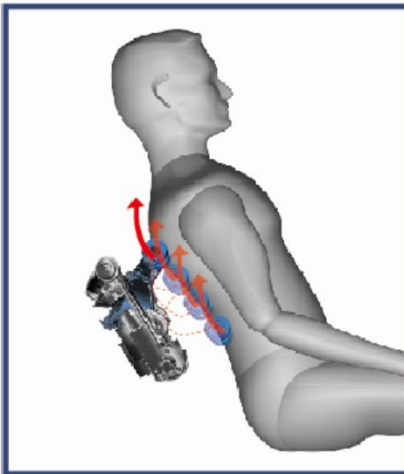

- Upper 4D + lower 3D
- Versatile massage technique combinations
- Tackle pain points of the body more professionally

- Super long hard massage arms
- Deeper tissue penetration
- more vigorous targeted massage to relieve tension and fatigues

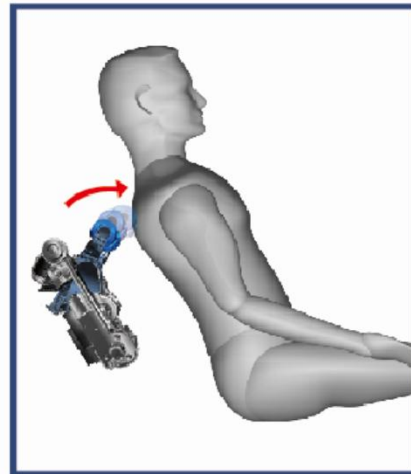

- Sync massage for multi-parts
 - Neck & shoulder + waist & hips; back + hips
 - It is Like experiencing two full body massages at the same time

Bipolar Hall Sensor Body Scan

+

AI intelligent body scanning

It adopts multiple factors adjustment system and intelligent algorithm to deliver more comprehensive analysis, more recorded counting signal, quicker response and more accurate controls in body scanning.

3 Core Technologies - Flexible Track

Flexible Track

Patent No.: CN 20797991 U

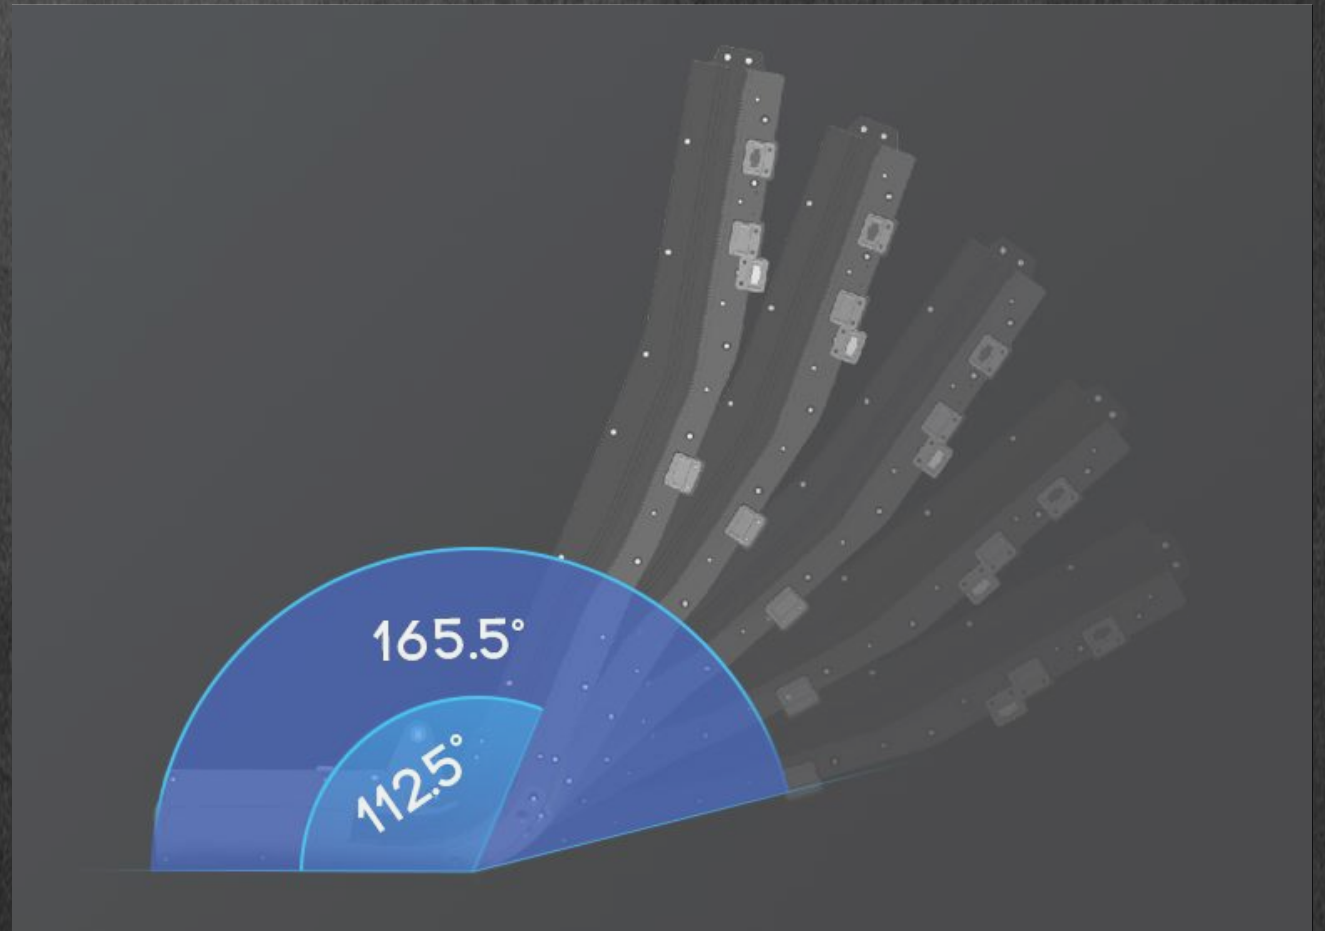

Creative self-adaptive flexible track. The track outstretches while the massage chair is reclining, from 1160mm to 1210mm, the travel distance of mechanism increased from 1160mm to 1210mm, delivering three dimensional massage along neck, shoulder, the entire length of the spine, and all the way down to hips and thighs.

Initial angle : 112.5°

The effective range amounts to 1160 mm

Terminal angle : 165.5°

The effective range amounts to 1210mm

3 Core Technologies - Flexible Track

Features of Flexible Track:

- 100% fitting to the body curves
- Spacious and not rigid
- provides an advanced level of comfort

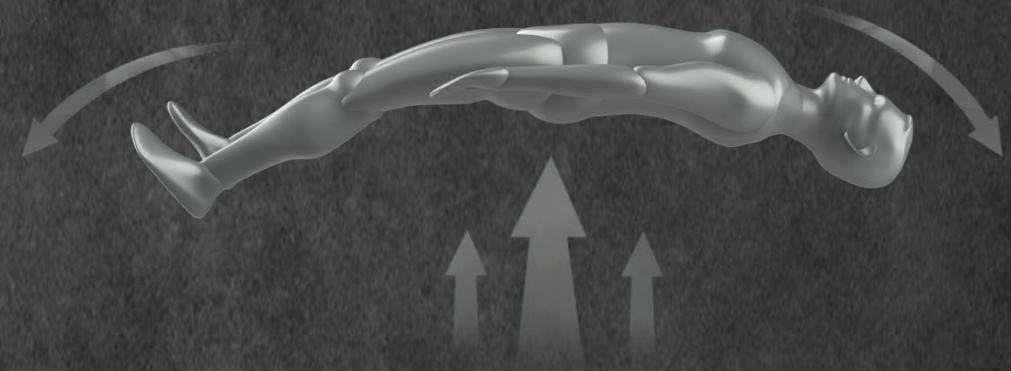

- > 100 micro angles
- Offers increased support to your body
- Brings a deeper state of relaxation

- 165.5° almost flat
- Better stretching of the back, waist and legs
- Truly realize the Thai-style Stretching massage

- Longer effective distance
 - Effective range amounts to 1210mm when the track opens
 - larger massage coverage
- 

3 Core Technologies - Flexible Track

The chair that can truly realize **Thai-style Stretching**

RONGTAI Innovative flexible track breaks through the structure limitations of massage chair track, the auto opening-closing flexible track injects new life into massage chair industry. When the track is fully opened, the lie-flat position allows users to relax optimally.

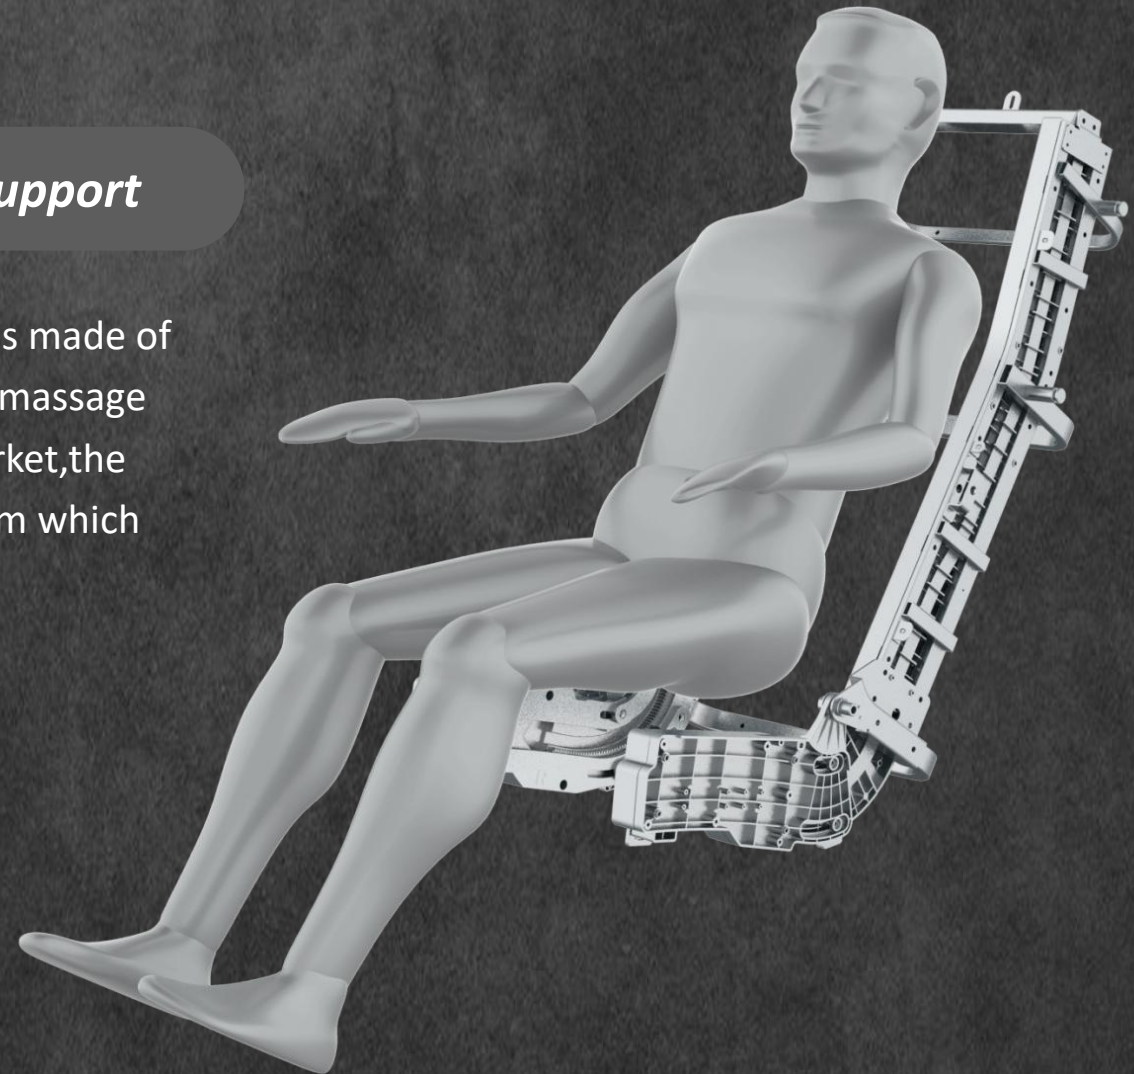

3 Core Technologies - **Flexible Track**

Heavy Duty Iron Frame Provides Solid Support

The efficiently designed and constructed iron frame is made of heavy duty iron to provide optimum support for the massage chair. Heavier than 90% of massage chairs in the market, the thickness of the flexible track metal goes up to 5-6mm which can provide stronger support and longer lifespan.

Top Quality Materials

Strong, durable and specially-made anti-impact and shock absorption screws are used to fix all vibration parts.

3 Core Technologies - Health Detection

Health Detection Sensor

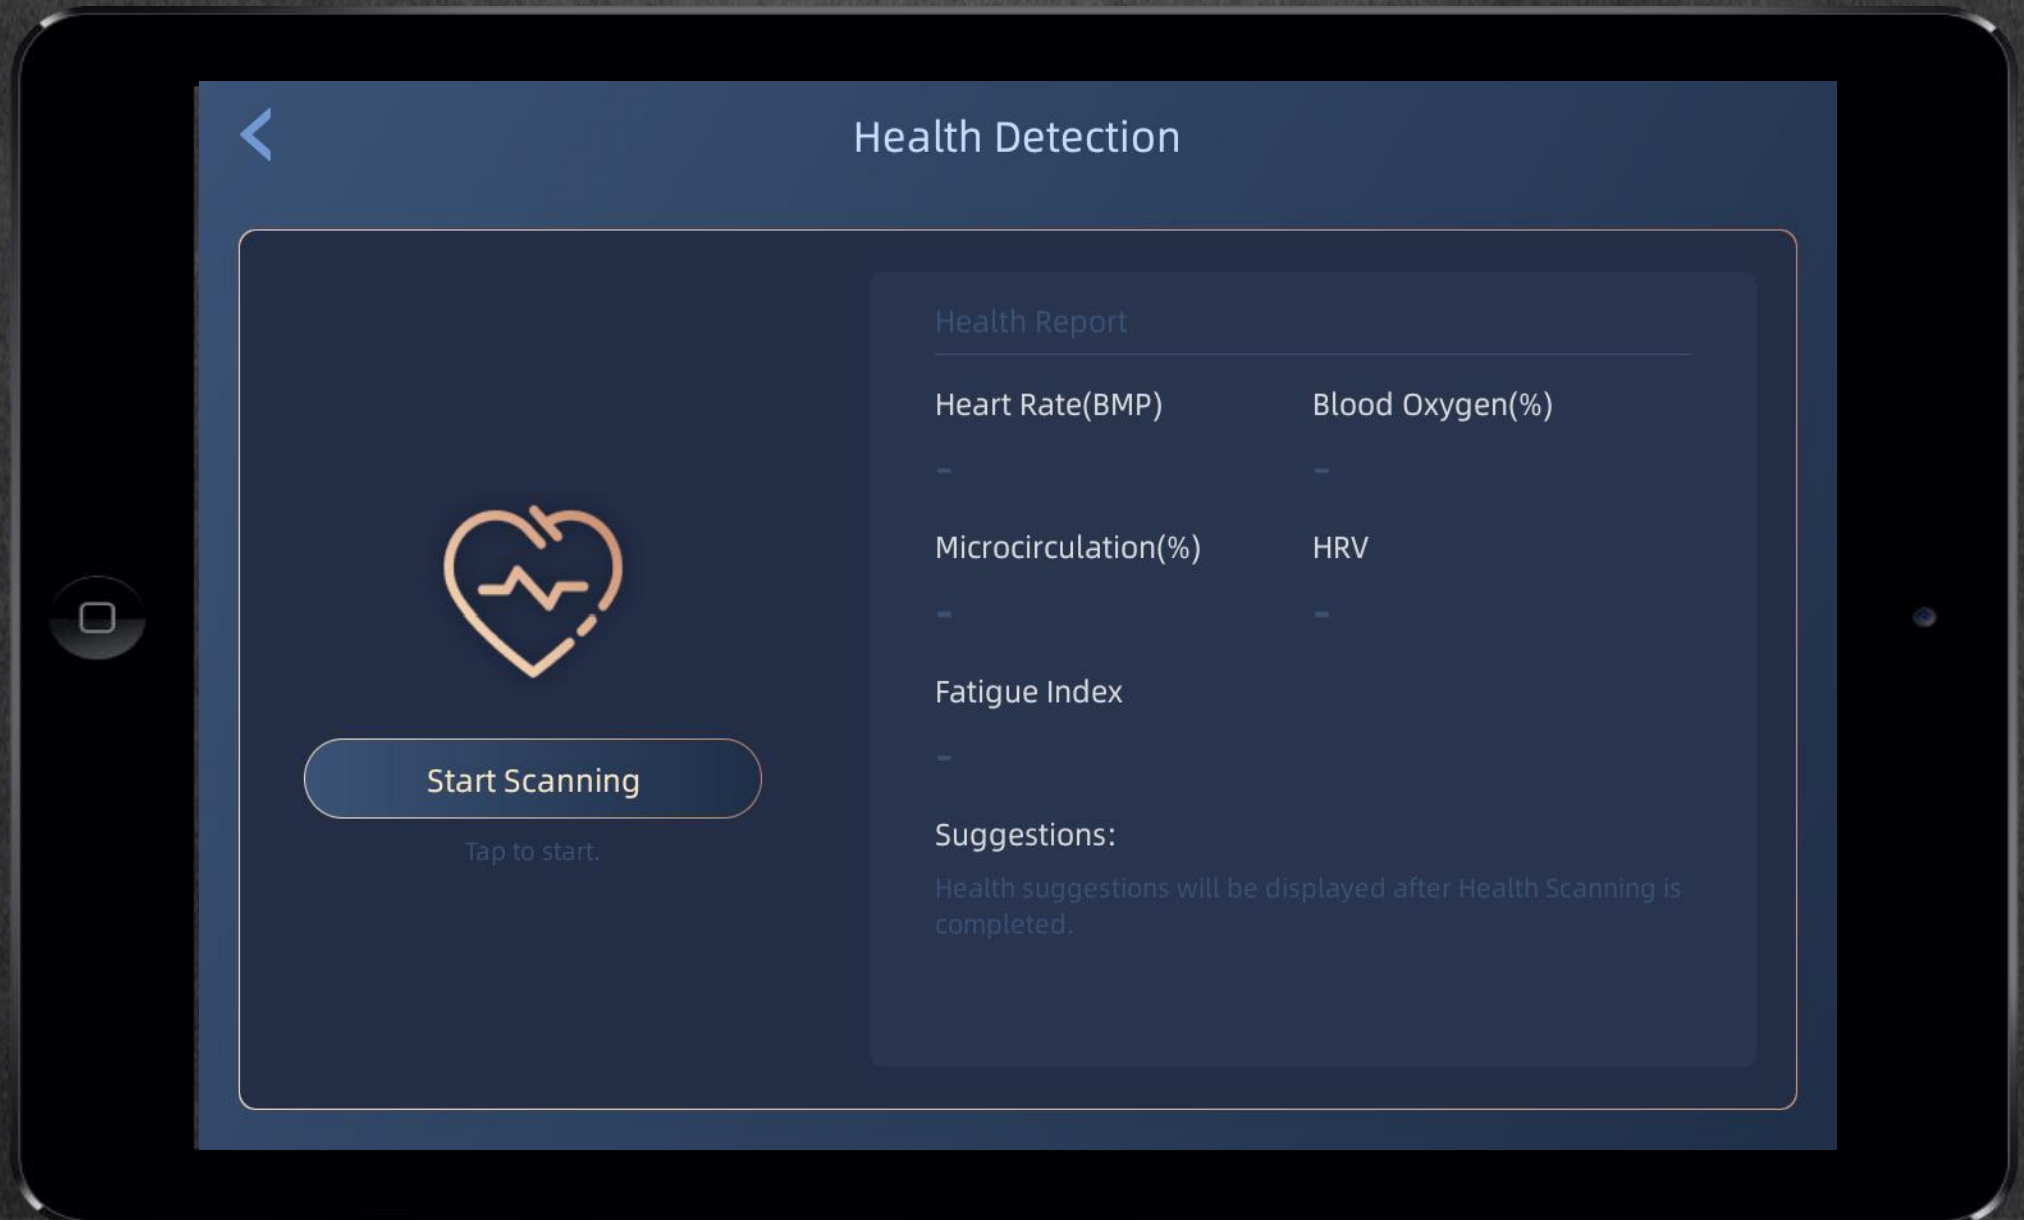

at the right armrest

It uses photo detector to detect pulse waves

Sensing technologies have incorporated into our massage chair for obtaining information representing body conditions. Information such as heart rate, blood oxygen, micro circulation will be taken by putting fingers on the health detection sensor at the right armrest , and health reports will be generated and sent to mobile devices that user can take to next doctors visit to help monitor and maintain your health and wellbeing.

3 Core Technologies - Health Detection

PART 02

5 Innovative Functions

Patented two way traction legrest

3D Air pressure massage for the leg

Heating for waist + calf + sole

Fresh aromatherapy

Air cooling system at backrest

5 Innovative Functions - **Patented Two Way Traction Legrest**

Patented Two Way Traction Legrest

Invention patent application number:

201810631527.2

Invention patent application number:

201820946303.6

Upper legrest:

Two way traction by 70mm

Lower footrest:

Two way traction 150mm

5 Innovative Functions - **Patented Two Way Traction Legrest**

Features of Patented Two Way Traction Legrest:

Intelligent auto detection function will confirm the feet location and adjust automatically to fit the leg length and provide custom-tailored massage experiences for all users.

Fit More People

The upper and lower parts of leg and foot unit can move up and down by up to 22cm to follow the exact stature of users(150cm-195cm)

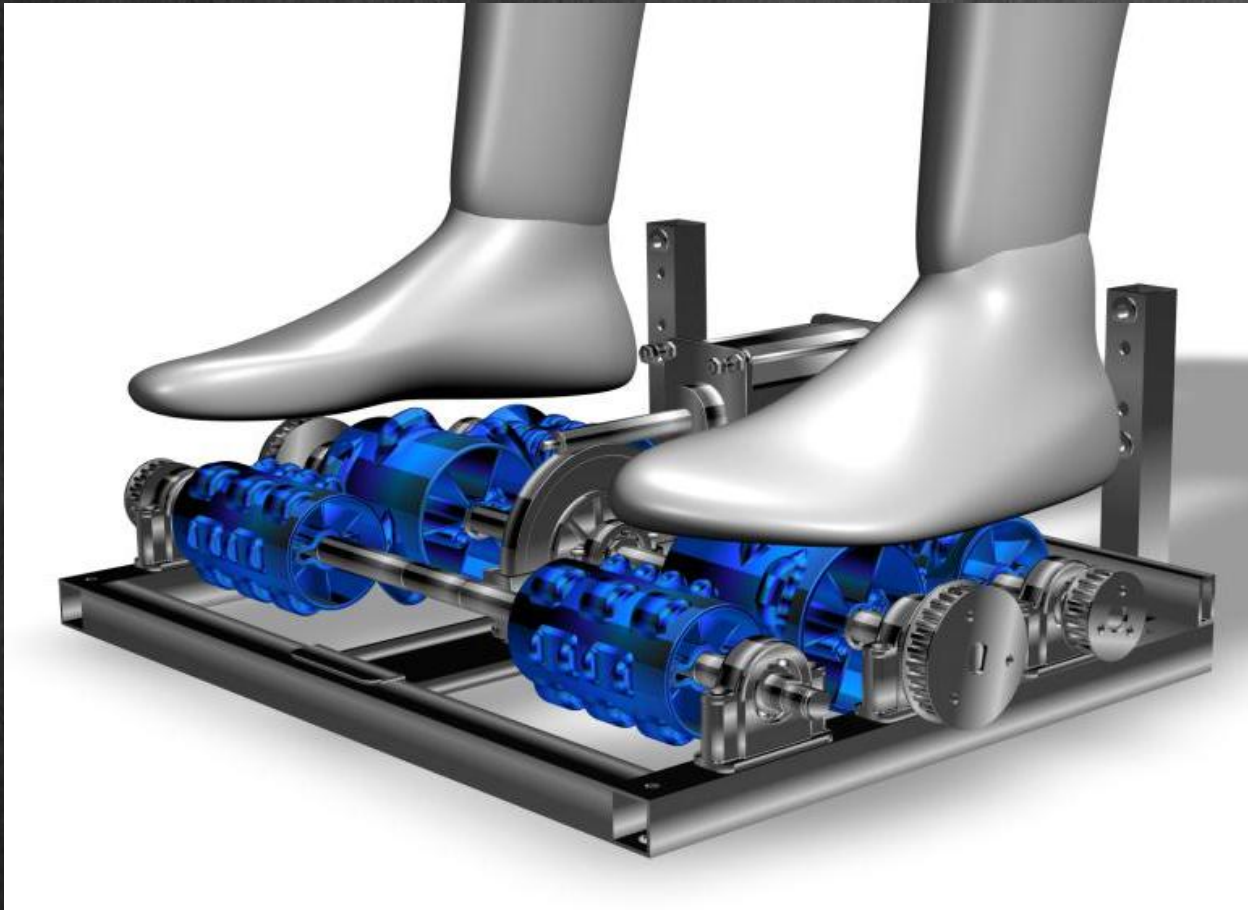

Better Massages

Patented two way traction legrest delivers better stretching and more thoughtful massage experiences.

Covers More of the Leg

The two way traction leg and foot unit helps stretch and lengthen out the deep side of our leg's muscle, joint, ligament and tendon.

5 Innovative Functions - **Patented Two Way Traction Legrest**

Three Foot Rollers with Heating Function Coupled with Enveloping Air Pressure Massages

Warm rolling and pressing massages for foot can help soften hard muscles, dilate blood vessels and increase blood circulation around the foot and legs.

- With 3 speed settings, the warm spiky rollers perform hand simulation rolling and shiatsu massage underfoot;
- Airbags at both sides of foot apply alternating squeezing massage to mimic the forward and reverse human hands kneading massage.

5 Innovative Functions - **Patented 3D Airbag**
Massage for **Back of Knee**

Patent No.:CN215779744U

New 3D Air Pressing Massage for the Calf

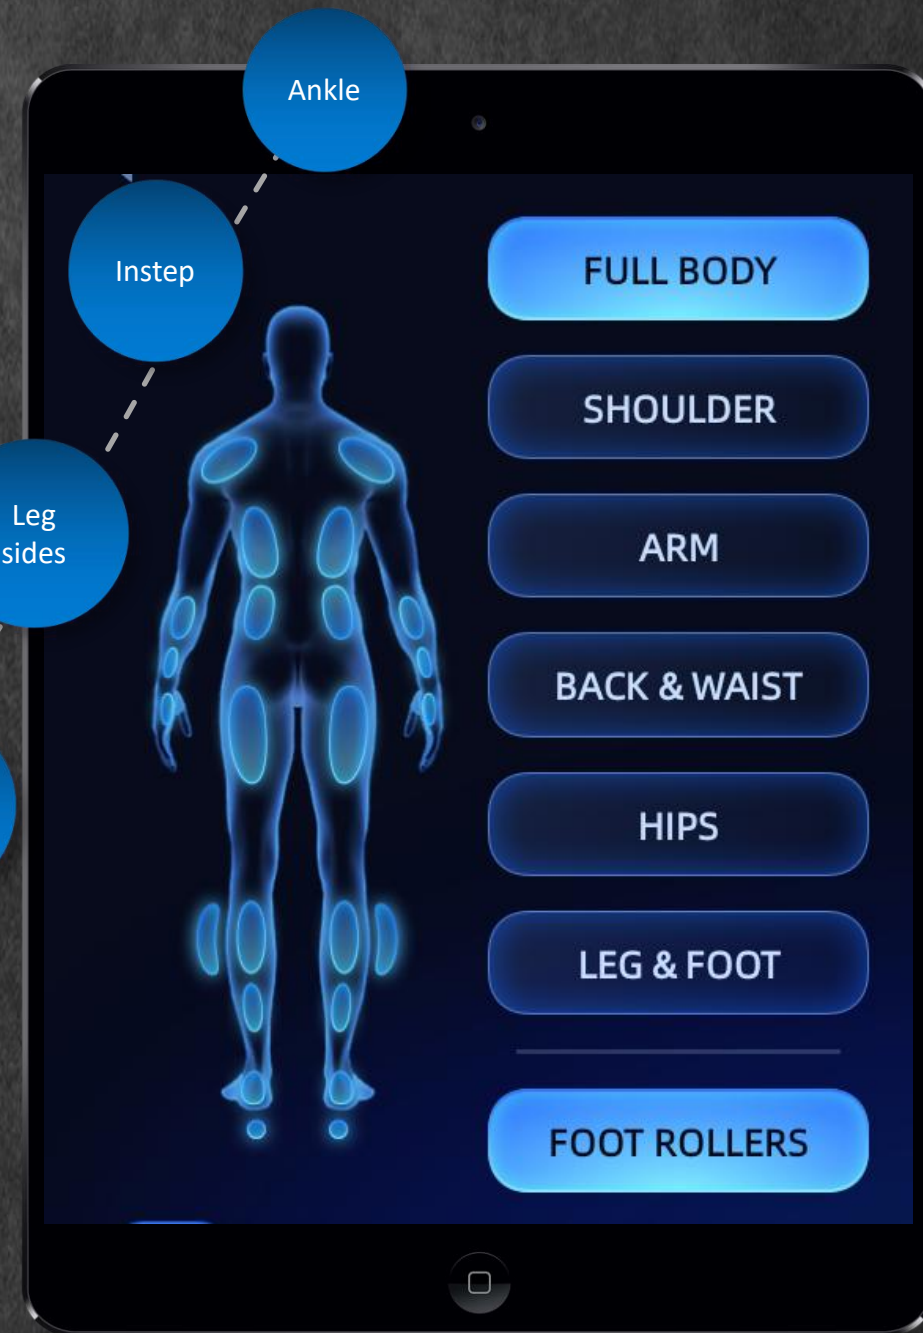

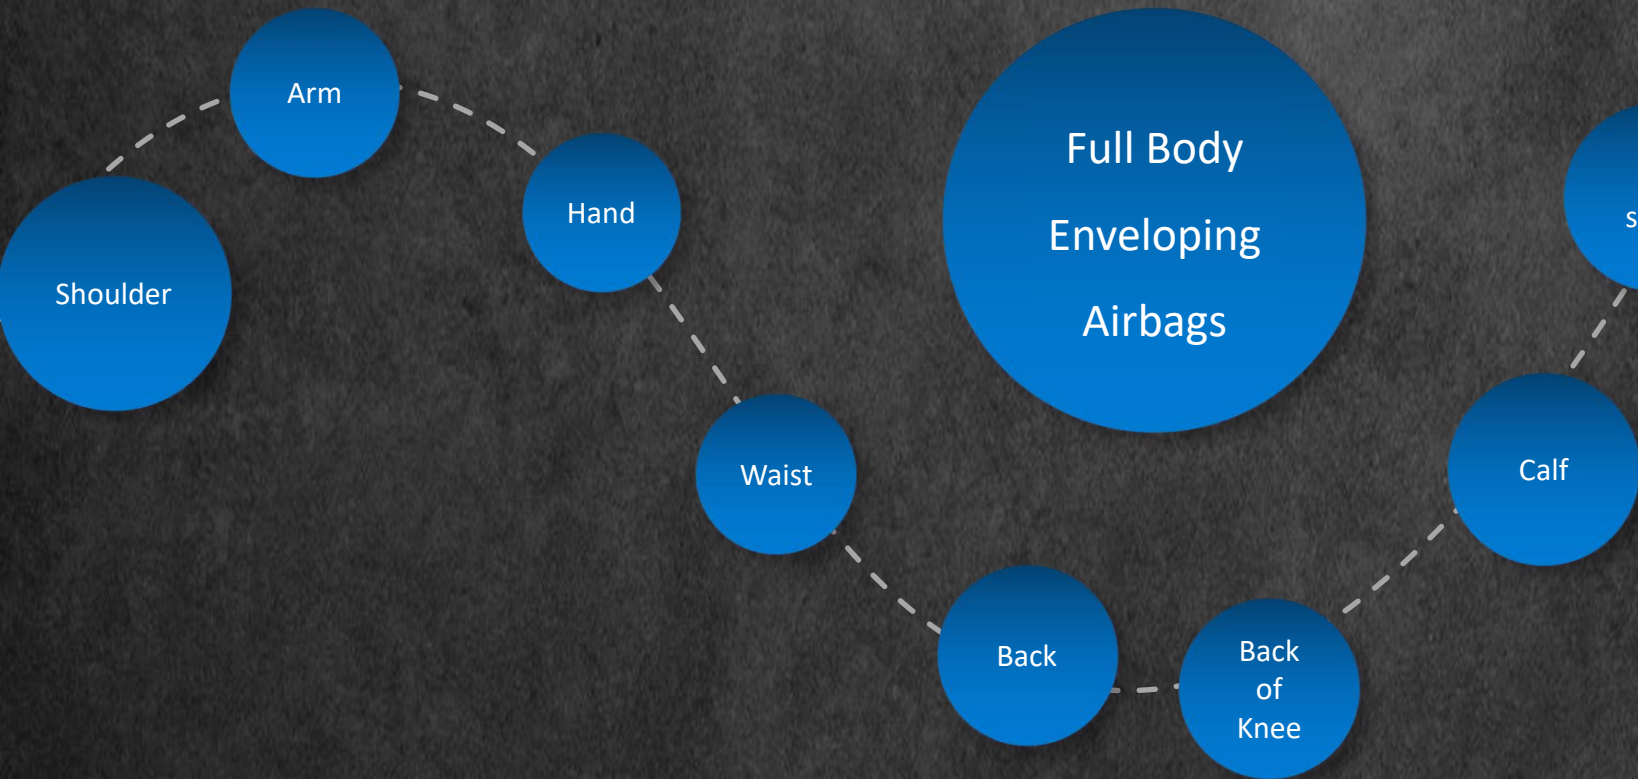

Creating 3D Massage Experiences

The 3D airbags with 3 gears intensity settings can simulate human hand massages for the back of knee to improve circulation in the area and reduce overall pain and stiffness.

5 Innovative Functions - Patented 3D Airbag Massage for **Back of Knee**

Patent No.:CN215779744U

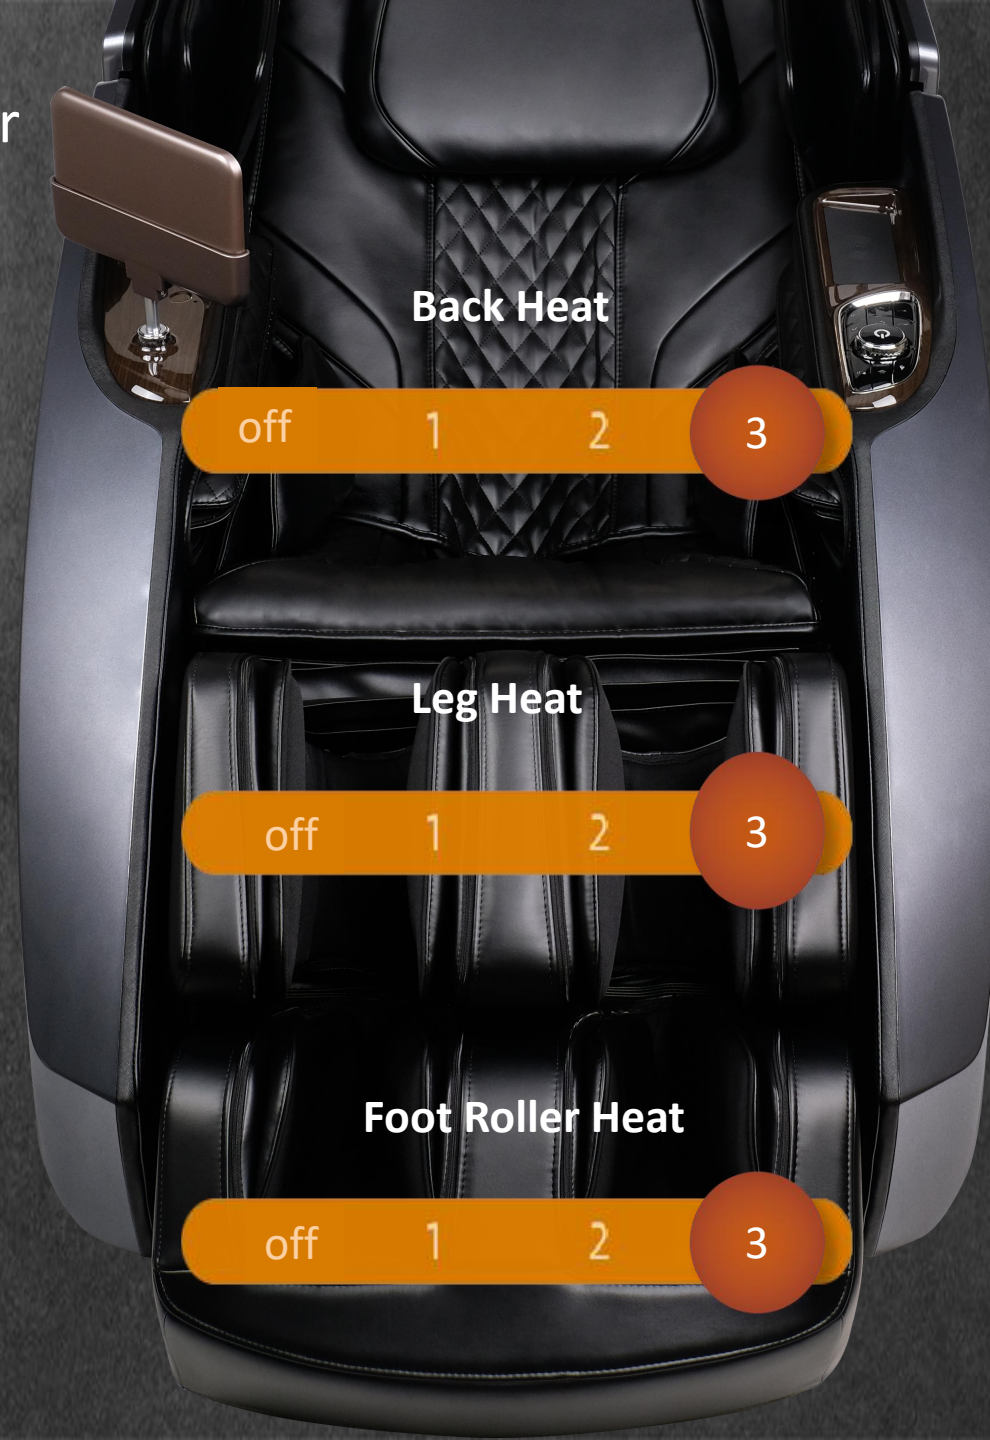

5 Innovative Functions - **Warm Heat** for Back, Waist, Leg and Foot

Independent Controlled Heating with three gears adjustment

RT8900i is incorporated with fast heating system providing steady warm compress for the back, waist, leg and foot to increase blood circulation and help to soften hard muscles.

5 Innovative Functions - Fresh Aromatherapy

Special Aromatherapy

Aromatherapy can alleviate anxiety and ease stress and help the body and mind to reach a deeper state of relaxation.

Replaceable aromatherapy set has been built in the chair. Choose your favorite scent, and stimulate your sense of smell as you indulge in each dreamy, comfortable, warm and romantic massage experience.

5 Innovative Functions - Cooling Air Flow Back Cushion

Air Ventilation Cushion with Cooling Fan

Massages help boost the blood circulation, therefore the body temperature will increase during massage. The built-in fan will circulate cool air to your back and effectively eliminate hot cushion in summer to keep you cool and dry at all times.

PART 03

3 Ways to Control

Touchscreen controller

Offline voice control

Quick buttons and rotary switch

3 Ways to Control - Touch Screen Controller

8 Inch Tablet Controller

8 inches touch screen injects further sleek sense of sophisticated modern design;

Easy-to-use touch screen, you may check the intensity level and remaining time at a glance.

3 Ways to Control - Quick Buttons + Rotary Switch

Quick Buttons + Rotary Switch

Armrest quick controls allow quick, hands-on control of your massage chair.

The press button on the controller can turn on/off the chair or toggle auto massage programs; Rotary switch can raise/recline the backrest.

3 Ways to Control - Offline Voice Control

Voice Control System

You can turn on/off the massage chair, start/switch auto or manual programs by speaking the command, which frees your hands and allows head to toe rest.

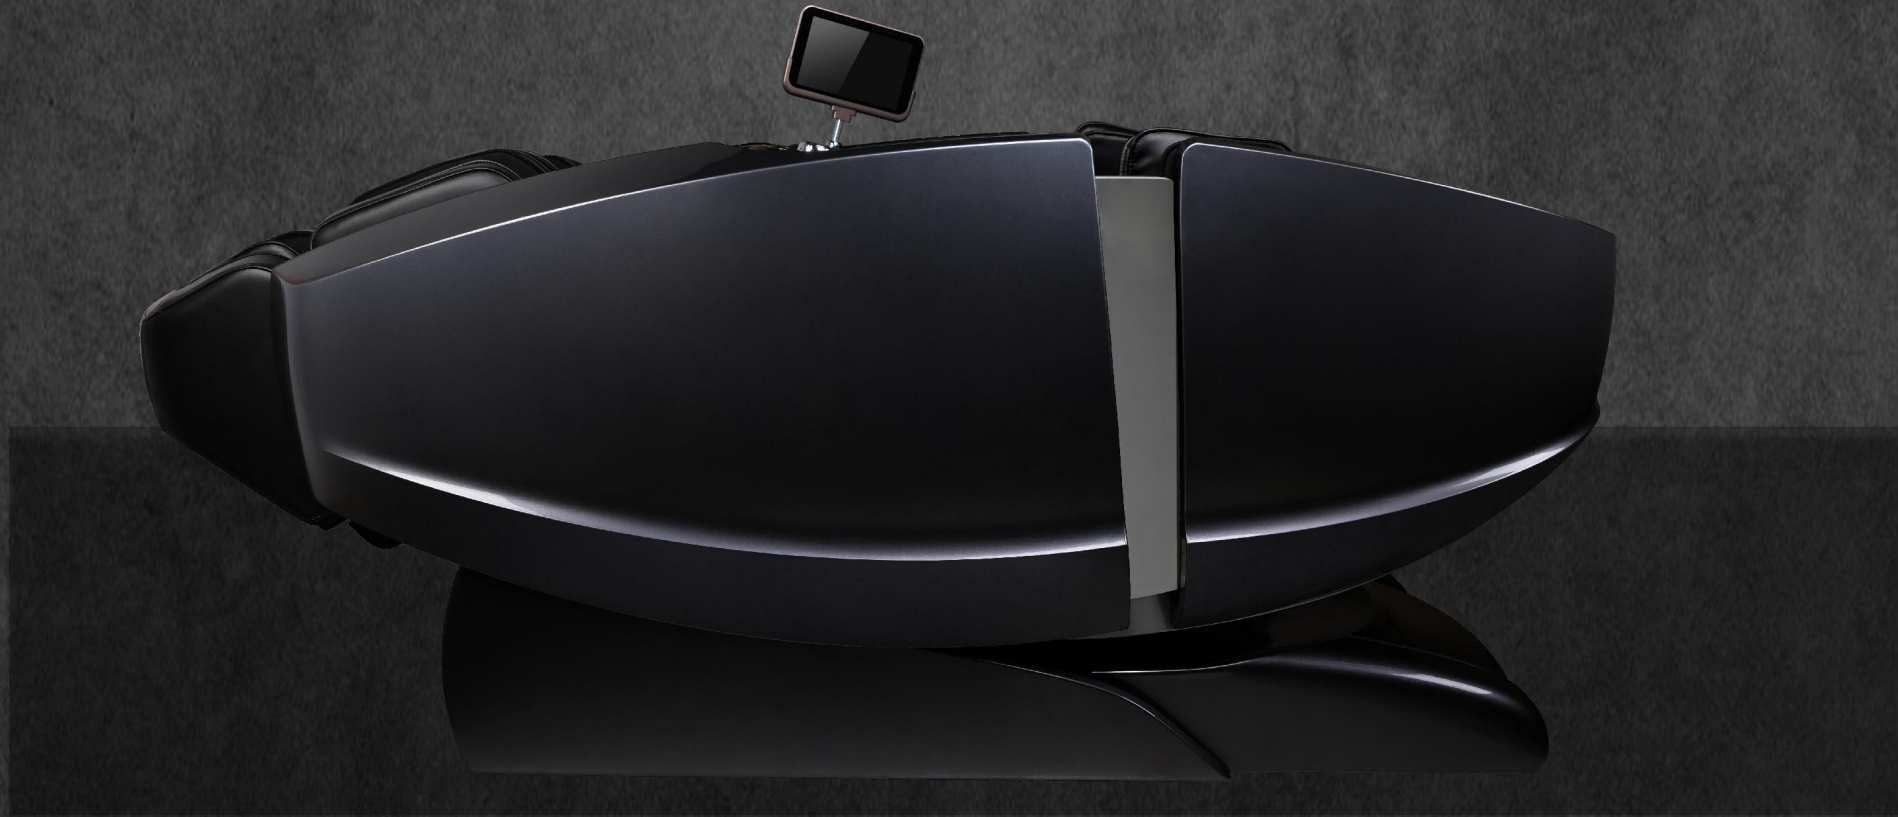

PART 04

8 Fine Details

*24 Wellness massage programs, 10-20-30 mins count down timer,
Semi-enclosed space capsule, wireless charging, USB port,
diamond-shaped lattice lines
wall hugger space saving design, surrounding stereo speakers*

8 Fine Details - Semi-Enclosed **Zero Gravity Space Capsule**

Saving Space

5cm wall clearance

Semi-Enclosed Space Capsule

Safe and comfy

Zero Gravity Position

Ultimate relaxation

8 Fine Details - **Wireless Charging**

Wireless Charging Dock

It uses an electromagnetic field to transfer energy through electromagnetic induction to charge batteries. You can put the wireless charging phone onto the charging pad to charge the device when needed.

8 Fine Details - Surrounding Stereo Speakers

Maximize your massage session by connecting to any smart devices

With stainless steel spiral sound hole, multichannel soundtracks, stereo speakers reproduce dramatic rises and falls of the sound, providing unique experience of excellent melody.

8 Fine Details - 24 Auto Wellness Programs
